For us, innovation means a continuous wonder for what technology, design and creativity can do when paired with commitment and the drive to be the most reliable partner for security specialists.

This is at the core of the Keyline USA **Product Guide 2016**, which is a valuable guide for mechanical, electronic and digital key cutting machines, cloning devices and transponder technology, electronic heads, keyless kits and horseshoes.

Keyline research completely changed all of them. Our original operating and user interface software constantly anticipates the future. The transponder technology has reached surprising heights and electronic heads, keyless kits and all our keys provide professionals with the tools they require to offer excellent service.

Whether they are automotive keys or systems for door keys, our latest products open up incredible opportunities for key cutting and efficiency standards.

Since 1770 we have been constantly dedicated to raising our commitment for innovation and quality. Our history of these is what makes it possible for us to help locksmiths and automotive professionals every day, in every part of the world.

Massimo Bianchi, Keyline Strategic Planner

994 LASER

- Cuts by code, decode or depths and duplicates high security, double-sided edge cut and 6-cut Tibbe keys
- Complete database of high security systems to be cut built-in; no computer needed
- Innovative, 7" color touch screen console features dynamic graphic representation of key cuts and faster software functions
- Integrated stand to hold jaws, tools and cutters
- Electronic calibration
- Key information is automatically converted to original lock specification when duplicating
- Universal 2.5mm carbide cutter used for all high security & Tibbe applications, 1.5mm for edge cut
- Universal tracer
- Software easily updated using USB memory stick or Internet
- Includes A & C jaws to cut most popular high security laser keys; B, D, G Jaw Kit and H jaw available as optional equipment

Keys

TECHNICAL SPECIFICATIONS

Power Supply	110v / 60Hz
External Connections	2 USB, 2 RS232 serial ports, 1 LAN
Cutter Speed	6000 RPM
Key Reading / Decoding	Electrical contact
Mobile Capability	Requires pure sine wave inverter (sold separately)
Dimensions	12" x 15" x 14" (machine), 8" x 6" x 3" (console)
Weight	45 lbs.
Warranty	2 years

ACCESSORIES

PART NUMBER

DEZMO

- Cuts by code and duplicates residential, commercial, padlock and automotive keys
- Complete database of key systems to be cut built-in; no computer needed
- Innovative, 7" color touch screen console features graphic representation of key cuts
- 4-sided jaws with 80mm carbide cutter
- Optical key reading
- Optional robotic key feeder, Dromo (as shown)
- Software easily updated using USB memory stick or Internet

Keys

TECHNICAL SPECIFICATIONS

Power Supply	110v / 60Hz
External Connections	2 USB, 1 LAN, 1 VGA socket
Key Reading / Decoding	Static reading from digital image (Optical + CCD)
Cutter Speed	2000-3000 RPM (variable speed according to program)
Dimensions	21" x 20" x 18" (machine), 10" x 15" x 4" (console)
Weight	100 lbs.
Warranty	2 years

ACCESSORIES PART NUMBER

Dromo Key Feeder	B1699 (available for Dezmo Open only)
------------------	---------------------------------------

SPARE PARTS PART NUMBER

80mm Carbide Cutter (F01)	RIC08143B
Standard Tip Stops	BA001

META 106

- Four-way reversible jaws securely clamp residential, commercial, padlock and single and double sided automotive keys
- Microswitch activated carriage with improved spring loaded design
- Press down levers for easy jaw side selection
- Overhead light with drop down magnifying glass
- One-piece jaw alignment with locking mechanism preventing accidental jaw release
- Wide jaw spacing accommodates longer and larger headed keys
- Micrometric tracer adjustment for quick and accurate depth calibration
- Also available in carbide cutter version (Part number: B106-C)

Keys

TECHNICAL SPECIFICATIONS

Power Supply	110v / 60Hz
Cutter Motor	¼ HP
Cutter Speed	1680 RPM
Dimensions	18" x 15" x 17"
Weight	55 lbs.
Warranty	2 years

ACCESSORIES PART NUMBER

Power Supply	Powered by user device (PC, tablet or phone)
External Connections	Micro USB port; 2 connection cables included (USB and USB-DTG)
Dimensions	5" x 4" x 4"
Weight	1 lb.
Warranty	2 years

TKM. XTREME KIT

TKM. Xtreme Kit is the only system in the world that can clone **Megamos® Crypto ID48** transponders used by several car makes. The extraordinary performance of Keyline cloning devices offers an exceptional level of flexibility, that considerably widens the range of applications: **884 Decryptor Mini** with the latest generation Keyline Cloning Tool App and **884 Decryptor Ultegra** with the powerful Keyline Cloning Tool software for the PC (with Windows 7 and higher).

TKM. Xtreme Kit makes it possible to clone **Megamos® Crypto ID48** transponders of many car makes, including several Volkswagen, Audi, Porsche, Cadillac, Chevrolet, Citroën, Ferrari, GMC, Hummer, Isuzu, Jeep, Maserati, Pontiac and Volvo models, totaling over 50 models available to date.

TKM. Xtreme Kit is a software update that enables the cloning of **Megamos® Crypto ID48** transponders with Keyline TKM heads. The activation is enabled by inserting the TKM. Xtreme electronic head in your device while connected to the Keyline Cloning Tool app for phone, tablet or PC. Once activated, the head can then be subsequently reused as a standard new TKM head.

Thanks to the addition of the **TKM. Xtreme Kit**, **884 Decryptor Mini** and **884 Decryptor Ultegra** can clone almost 2,000 car models: up to 95% of the cars, trucks and motorbikes from the past 20 years still on the road today.

TKM. Xtreme Kit is the innovative result of Keyline's constant research and development to achieve the latest technological advances for all automotive professionals.

* The new Volvo Keyless Kit will be available on April 2016.

The Megamos® Crypto applications listed are general applications based on known market information available and the cloning equipment is designed for use with Megamos® Crypto ID48 transponders. Certain makes, models and years may not successfully clone based on vehicle production specifications, transponder and/or immobilizer variations, aftermarket installed parts or vehicle modifications. Actual cloning times may vary based on, but not limited to, current request volumes and end user computer, phone & Internet speed. Keyline does not assume any liability for claims, costs and/or damages resulting from correct or misuse of the information provided.

KEYLESS SYSTEMS

Keyline uses TK100 technology to expand automotive applications for specific BMW, Volvo, Toyota, Kia, Hyundai, Nissan, Infiniti, Jeep, RAM, Chrysler and Dodge vehicles that use the smart key or push button start technologies. Innovative clonable FOB's with an emergency key in a convenient package, compatible with both the 884 Decryptor Ultegra and the 884 Decryptor Mini.

POD KEYS

Keyline POD Keys are chipless shell keys that give automotive professionals the ability to create their own transponder keys using original transponders or harvested chips from existing transponder keys to make a new key or replace a key that is damaged.

The innovative new style POD Keys feature an OEM-like design and accommodate a variety of original transponder chip types including glass and wedge styles as well as feature a pinhole release for easy access to chip holder tray for replacement or removal.

New style POD Keys are noted with  image
