

EEPROM XTRA. KIT

SOFTWARE UPDATE FOR 884 MINI & 884 DECRYPTOR ULTEGRA

4 EASY STEPS FOR KEY CREATION

Run a search of the vehicle whose key you need

Identify the vehicle's immobilizer

Load the extracted .bin file from the EEPROM memory

Write the data to the clonable transponder key

EEPROM XTRA. KIT FEATURES

- The safest professional solution to create one or more transponder key copies when the original is not available
- Software update for 884 Mini and 884 Decryptor Ultegra; activated to user account with EEPROM activation head
- Clone keys without the original key with Keyline EEPROM software
- Requires an EEPROM Reader* to read EEPROM .bin file, then write to the key
- Maximizes versatility of Keyline cloning tools and uses Keyline technology exclusively including clonable keys
- Different from other solutions, EEPROM Xtra does not alter the information stored in EEPROM memory
- Large database of vehicle makes, models and years with diagrams and pictures of EEPROM locations
- Does not require purchase of tokens or additional modules to complete the cloning process
- Requires Keyline Cloning Tool program (free download) and a Windows 7 (or higher) PC
- Part Number: EEPROM-XTRA-KIT

**Requires separate EEPROM memory device for EEPROM read, easily available in the market, and is reserved for experienced professionals*

COMPATIBLE DEVICES

884 Mini or 884 Decryptor Ultegra and a Windows PC (7 and higher)
